Title: Weller® Soldering Systems - Military and Commercial Soldering Station Standards Compliance

Model (s): Weller® WES51 / WESD51 / WD1 / WD2 / WD1M / WD2M / WR2 / WR2000 / WR3M WR3000M Series Soldering and Rework Stations

Date: January 26, 2011

Editor: Info Needed

Description:

“Certification to MIL-STD-2000 and IPC / EIA J-STD-001E”

During our 70-plus years in business, we’ve set the bar high so that all of our product lines exceed industry standards, not just meet them. You can feel confident knowing we go the extra mile to produce the highest caliber soldering and rework systems. We believe you deserve nothing less.

Weller® WES / WESD / WD / WD”M” and WR / WR”M” Soldering and Rework Systems are designed and manufactured to our strict quality specifications, reflecting our product excellence standards.

The following products meet or exceed the requirements for MIL-STD-2000 (all revisions) and IPC / EIA J-STD-001E – Appendix B.

- Model WES51 / WESD51 Soldering Stations when used with the respective soldering tool (PES51)
- The WD / WD”M” and WR / WR”M” Soldering and Rework Systems when used with conventional soldering tools (WSP80, WP80, WP120, WMP, WTA50, etc.)
- The WD”M” and WR”M” products when used with the WMRP-MS Soldering Tool with RT-MS Series Soldering Tips and the WMRT-MS Thermal Tweezers with RTW-MS Series Soldering Tip Cartridges
